

Mucus Cough Relief 100 mg/5 ml Oral Solution Guaifenesin

✓ Thins and loosens chest mucus

✓ Non – Drowsy

150 ml

Read all of this carton for full instructions.

What this medicine is for

This medicine contains Guaifenesin, which belongs to a group of medicines called expectorants, which act to relieve thick, sticky mucus from the chest. It can be used to relieve mucus coughs without causing drowsiness.

Before you take this medicine

X Do not take:

- If you are allergic to any of the ingredients in this medicine
- If you are taking any other medicines to stop you coughing

! Talk to your doctor:

- If you have a long-term cough or asthma (do not take this medicine if you are wheezing or if you are having an asthma attack)

! Talk to your pharmacist or doctor:

- If you are pregnant or breastfeeding

Other important Information: This medicine may interfere with the results of urine tests. If you are having any urine tests, tell the doctor or hospital staff that you are taking this medicine.

Information about some of the ingredients: This medicine contains less than 1 mmol sodium (23 mg) per 5 ml, that is to say essentially 'sodium-free'. This medicine contains 1.8 g of liquid sugar (sucrose) per 5ml. This should be taken into account if you have diabetes. If you have been told by your doctor that you have an intolerance to some sugars, contact your doctor before taking this medicine. This medicine contains glycerol which may cause headache, stomach upset and diarrhoea.

✓ How to take this medicine

Check the seal is not broken before first use. If it is, do not take the medicine.

Age	How much to take	How often to take
-----	------------------	-------------------

Adults and children over 12 years.	Two 5 ml spoonfuls	Every four hours, up to 4 times a day
------------------------------------	--------------------	---------------------------------------

This medicine should be swallowed.

Do not give to children under 12 years.

Do not exceed the stated dose.

If a cough lasts for more than 5 days, or comes back, stop taking this medicine and talk to a pharmacist or doctor.

If symptoms do not go away talk to your doctor.

If you take too much: Talk to a pharmacist or doctor.

Possible side effects

Most people will not have problems, but some may get some.

! If you get any of these serious side effects, stop taking the medicine. See a doctor at once:
