

SOME POINTS TO KEEP IN MIND

max. printed area

- * Eye mark must be in black
- * Area between eyemarks: in deep contrast with black, (strong preference: white) no printing, no contrast difference
- * Eyemark is half placed on the next printrepeat
- * 1.5 mm area above eyemark to provide right slicing.
- * e -sign has to be on the packing. VSI produces according to the average system in which this sign is applied. A minimum height of 3 mm is required.
- * Recommended place best before/lotcode: bottom of packing. Area 25x10mm, printed in contrast with black. Datecode will be printed in
- * Recommended size EAN 13 Code 100%. Be sure that any other size is still scannable. See www.ean-int.org for info using EAN code
- * Reel wind-up as shown:
- * Please do not print text in an area 1.5 mm from the edges of the foil
