undesirable effects or if symptoms persist.

effects, contact your pharmacist or doctor

Do not smoke or go near naked flames - risk of severe burns. Fabric (clothing, bedding, dressings etc) that has been in contact with this product burns more easily and is a serious

fire hazard. Washing clothing and bedding may reduce product build-up but not totally remove it.

There are no known side effects resulting from the use of the product. However, do not use in the presence of hypersensitivity to any of the ingredients. If you are in any doubt apply a small amount of serum on the inside of your forearm. Hirritable-red spots appear, it is advised not to-use—the product. Inform your doctor or pharmacist of any understable effects as if a product present a series.

In case of symptoms worsening, or if you experience an inflammation, an allergic reaction or an infection occurs, always inform your doctor.

There are no known sides effects when using Boots
Dermacare Rosacea Treatment Serum in conjunction with
other topical creams or oral drugs. In case of any undesirable

### **About Rosacea**

Rosacea is an inflammatory skin disease that mainly affects the central T-zone area of the face, such as the forehead, chin and the lower part of the nose. It affects the skin barrier function and the most common symptoms of rosacea are skin dryness, persistent redness, bumps and pimples, visible blood vessels and stinging and burning of the skin.

#### What causes Rosacea?

Rosacea can be caused by many different factors and these can also vary widely from person to person. Some of the can also vary widely from person to person. Some of the infore common triggers includer sun exposure, emotional or environmental stress, cold weather, consuming particular foods and drinks, hot baths, skincare, cosmetics and also certain medications. Identifying the triggers of particular flare-ups in an individual can be of significant benefit in helping to minimise the occurrence and severity of the problem.

## **How does Boots Dermacare Rosacea Treatment Serum work?**

Boots Dermacare Rosacea Treatment Serum is useful in the symptomatic treatment of rosacea.

It helps to reduce the symptoms caused by rosacea such as erythema (skin redness), telangiectasia (spider veins) visibility and skin dryness, by restoring the physiological skin barrier function and hydration.

A protective film is created over the skin which helps to strengthen the cutaneous barrier which protects the skin from external environmental factors, which can otherwise exacerbate the condition.

The barrier created by Boots Dermacare Rosacea Treatment Serum helps to maintain skin hydration levels, so the affected skin stays moisturised and is less prone to drying out. This mechanism allows the physiological healing process through restoring skin balance conditions on compromised areas.

## **Directions**

- Apply the serum twice a day, preferably in the morning and last thing at night.

  Before applying Boots Dermacare Rosacea Treatment
- Serum, carefully wash the affected skin area and pat dry with a soft towel.

  Apply a thin layer of Boots Dermacare Rosacea -

Treatment Serum to the affected area of skin, gently massage in and allow to dry naturally.

Always wash your hands thoroughly before and after application.

Note: To open the tube for the first time, take off the cap and then remove and discard the neck-collar. Replace the cap and screw tightly back onto the tube, this will break the tamper seal. The tube and cap can then be used as normal.

After thirty days of continuous use, suspend the application for at least one week before restarting the treatme

# Warnings

- Product is for external use only. Do not ingest the product. Keep out of reach of children.
- Store in a dry place away from direct light at room temperature (between 5° and 30°C). Do not use if the pack is damaged.
