THICKER HAIR ON STAGE, ON SET, AND EVERY DAY

Studio and stage lights make many of my celeb clients' hair look thin, but everyday overhead lights or bright sun can be nearly as bad. That's why I recommend Nanogen Fibres to make fine or thin hair look thick and full. The natural keratin fibres bind to your own hair, instantly adding real density and volume. Whether I'm looking for a dramatic fashion-shoot style or the perfect natural look, it's my secret weapon on set.

kinetic™
LOOK FOR THE METAL STRIP

The tiny fibres become electrostatically charged as you shake them out of the patented Kinetic™ jar. This strong charge is unique to Nanogen, and ensures they bind strongly to any hair type, all day, even through wind, rain and perspiration.

PURE NATURAL KERATIN

Unlike copies, genuine Nanogen Fibres are keratin, exactly like your hair. The dermatologically tested fibres are safe and non-irritating, it's like adding "hair" to your own hair.

**DON'T HAVE DARK
BROWN HAIR?**

Nanogen comes in 10 shades to match any hair colour. You can even repeat with a different colour in some areas for highlights or a touch of grey.
